SECURITY SOLUTIONS FOR HOSPITALS

INTRO

Hospitals face various security challenges, such as ensuring patient safety, managing access to restricted areas, and safeguarding valuable pharmaceuticals and equipment.

LTS provides a variety of dome, panoramic, and specialized cameras that deliver full coverage with discreet and compact designs. Discover how our technology can help create a safer, more secure setting for your facility.

RISKS & TRENDS IN HOSPITAL SECURITY

CHALLENGES

Hospitals face several physical security challenges, including:

- **Patient Safety:** Ensuring the safety of patients, especially those at risk of wandering or memory loss, is a critical concern.
- **Pharmaceutical and Equipment Theft:** The theft of high-value medical equipment and legally controlled substances can impact operations and patient care.
- **Unauthorized Access:** Managing entry into restricted areas such as surgical rooms and ICUs is vital to maintaining a safe environment for patients and staff.

TRENDS

The global hospital security market is projected to grow from \$12.5 billion to \$51 billion by 2032, fueled by the rising demand for advanced solutions that integrate video surveillance, access control, and emergency notification systems.

- **Intelligent Video Analysis:** Fall-detection technology, like radar sensors, detects patient falls and instantly alerts the nurse station to ensure timely assistance, while people counting cameras automatically track visitor numbers for better capacity management and enhanced security.
- **Access Control:** Face Recognition Terminals ensure fast, accurate, and touchless access. They are ideal for sensitive areas like ICUs, operating rooms, and pharmacies.
- **Cloud-Based Solutions:** Cloud systems let users remotely and seamlessly manage video surveillance, access control, and alarm systems for unified security operations across healthcare facilities.

Integrating advanced security solutions allows hospitals to streamline operations and enhance patient care, creating a smart, patient-centric environment.

HOLISTIC SOLUTIONS FOR HOSPITALS

Hospitals today need advanced video solutions to ensure the safety of patients, staff, and facilities. LTS provides integrated security solutions that streamline access control, monitor critical areas, and enhance emergency response, creating a safer and more efficient healthcare environment.

CMIP7112F-SE

Fisheye camera with People Counting for capacity control

LTK3411MF

Face Recognition Door Terminal for authorized-only access

CMIP7553W5-SZ8

5-Directional camera for discreet yet expansive monitoring

CMIP7C43WI-SDLQ

Vari-focal InstaDome with Active Deterrence to ward off intruders

CMIP7C82WI-28MDA

4K Hybrid Illumination Dome with Direct Search to locate target quickly

CMIP9C8PW-SDL
Color 24/7 Panoramic camera for comprehensive corridor coverage

CMIP3142W-28SDA
Mini Dome with Corridor Mode

LTN8932D-P16N
32-Ch 8K NVR with Direct Search for efficient video analytics

CMIP7943WLPR-32R
License Plate Recognition camera for fluid vehicle management

PTZIP4C84W-X25IR
Panoramic PTZ with Smart Tracking for comprehensive monitoring

COMPREHENSIVE AND DISCREET MONITORING

NEW ARRIVALS

LTS offers a range of dome, panoramic, and specialty cameras, designed for comprehensive hospital monitoring. These solutions ensure full coverage while maintaining a discreet presence, making them ideal for hospitals, office buildings, and more.

Panoramic Bullet

- 180° distortion-free panoramic viewing
- 4K resolution with Color 24/7 for round-the-clock clarity
- Active Deterrence with built-in strobe light and audio alarm

InstaDome

- InstaDome allows angle and zoom adjustments remotely
- Hybrid Illumination seamlessly switches between IR and white light when detecting humans or vehicles
- Active Deterrence with red & blue flashing lights and siren

ENHANCED SECURITY AT A LOCAL HOSPITAL

CASE STUDY

Background: A local hospital in Houston needed an advanced security solution to provide smarter patient care and superior operations.

Solution: LTS designed a customized security system featuring LPR cameras to manage vehicle flow and record entry/exit data, Fisheye cameras with People Counting to track visitor traffic, and InstaDome cameras for discreet, remote monitoring. Face Recognition Terminals were installed to secure access control in sensitive areas like surgical rooms and ICUs, while Panoramic PTZs deliver broad coverage throughout the hospital. All devices are easily configurable through our cloud management system LPP and the mobile app, allowing for remote control and rapid response.

Result: The LTS solution improved the hospital's ability to monitor key areas and enhanced operational efficiency, creating a better experience for patients, visitors, and staff.
